MIDDLE EAST

MEDIA INFORMATION 2010

Facilities Management Middle East is the leading monthly title for FM and strata professionals, FM service providers, building owners and developers.

The FM sector is facing a challenging period. Global economics, the environment, health and safety and the push for standardised building regulations are all forcing it to evolve in a region that has, until recently, enjoyed a free reign.

Furthermore, the introduction of Dubai's strata law will continue to impact facilities managers locally and further afield as other Emirates and Middle Eastern regions consider implementation.

The above will regulate and restructure the market. *Facilities Management Middle East* will continue to be at the forefront, educating and informing its readership of developments.

Within facilities management both hard, soft and community services are integral disciplines. To this end, topics covered by the publication include: regional news and analysis, opinion pieces, features, case studies, industry profiles and interviews, legal updates, tenders, products and services.

FACILITIES MANAGEMENT MIDDLE EAST READERSHIP SURVEY**
